

# FILMOTECHNIC F17

## ► REMOTE HEADS AND CRANES

The F17 is smallest in the ultra light weight Filmotechnic telescopic crane line up. There is no other telescopic crane as well suited to life on small sets, delivering big shots! Ideally suited for use with the Q2 or Shotover G1, the has F17 exceptional range with a very short back end. Advanced features provide planning, encoded arm positions readout, configurable end stops and more. The base accomodates standard dolly track and is extremely manouverable.
