

# FILMOTECHNIC F32

## ► REMOTE HEADS AND CRANES

The F32 is the newest addition to the ultra light-weight Filmotechnic telescopic cranes. Upgraded with stiffer carbon fiber panels, the F32 can accommodate up to 60lbs with no arm deflection. Ideally suited for use with the Q2 or Shotover G1, the F32 has exceptional range with a very short back end. Advanced features provide planning, encoded arm positions readout, configurable end stops and more. The base accommodates standard dolly track and is extremely maneuverable.

### FILMOTECHNIC F32 QUICK SPECS

Max. reach from fulcrum	33'4"	Fulcrum to back	5'7"
Min. reach from fulcrum	6'2"	Min. reach from fulcrum	6'2"
Telescopic travel	27'4"	Max. width	3'1.5"
Max. overall length	38'11"	Min. height	6'1"
Min. overall length	11'9"	Column Travel	18"
Telescope speed	2m/sec	Base length w/levelers	5'8"
Arm weight	375 lbs	Max. drop down	14'5"
