

D TRACK

► CUSTOM SYSTEMS

The D Track is a custom narrow track system, exclusive to Tricked Out Pictures and available through Sunbelt Film Rentals. The D Track provides a quick to assemble, modular track system in 4' increments. The track dolly is fully captured on the track allowing for overslung, underslung, angled or vertical installations. The dolly is perfectly suited to the Shotover G1 but can be adapted to any stabilized remote head. To date we can provide SEC Eagle Eye winches and a modified Defy systems drive system.

The Eagle Eye winches have the option of fiber optic drive lines and up to 6m/s with a max speed attained in 12'.
